

## EDUCATION

### New Brunswick Community College

Diploma in Information Technology Programmer Analyst

2022 – Present

## SKILL

- **Front-End:** HTML, CSS, Bootstrap, JavaScript, jQuery, and React.js
- **Back-End:** Node.js, Python, C#(Entity and ADO.net), PHP and Java
- **Database Programming:** SQL, and NoSQL
- **Database Management System:** MongoDB, Microsoft SQL Server Studio, and Microsoft Access
- **Version Control:** GitLab, and GitHub
- **Software Testing:** Quality Assurance Testing using Selenium and Unit Testing using Visual Studio
- **Methodology :** Project Management, and Object-Oriented Analysis and Unified Modeling Language
- **User Interface Design:** Adobe XD, Figma, and Balsamiq
- **Integrated Development Environment:** Visual Studio Code, Visual Studio, and NetBeans
- **Communication:** Applied Writing Skills, Technical Writing and Research Skills, and Interpersonal Communication Skills

## PROJECTS

2022

- **Simple Calculator:** Developed a basic calculator application with a user-friendly interface for performing basic arithmetic operations using Java.

## PROFESSIONAL EXPERIENCE

### Front-End Developer

Cinfores Limited, Port Harcourt, Nigeria | 2021 - 2022

- Developed visually appealing and user-friendly website layouts and designs. This includes selecting color schemes, typography, and graphic elements.
- Participated in code reviews to maintain code quality, share knowledge, and ensure adherence to coding standards and best practices
- Developed interactive and dynamic web pages using JavaScript. Implementing client-side scripting for features like form validation, animations, and user interactions.
- Tested and debugged websites to ensure they function correctly across different web browsers
- Implemented accessibility features to make web content usable for individuals with disabilities, in compliance with WCAG (Web Content Accessibility Guidelines).

### Front-End Developer Intern

Cinfores Limited, Port Harcourt, Nigeria | 2020 - 2021

- Created wireframes or prototypes of web pages to plan the layout and functionality before full development.
- Documented frontend code, components, and project architecture for future reference and team collaboration.
- Used version control systems like Git to manage code changes and collaborate with team members on code repositories.
- Wrote clean and semantically structured HTML and CSS code to implement the design. Ensuring that the website is responsive and compatible with various browsers and devices.
